TourTurf® BEG Black Earth Granules

Oxide: 1-0-20 + 40 % Humic acids - Greens Grade

Fast release and slow soil improver with a high content of humic acids, fulvic acids and carbon.

TourTurf® BEG Black Earth Granules is a soil improver with a high content of humic acids, fulvic acids and organic carbon. The addition of humic and fulvic acids into your soil will help balance the soil pH, plant health and nutrient use efficiency (NUE). TourTurf® BEG helps to neutralise toxins and bind heavy metals. The combination of all these benefits builds plant biomass and creates a stronger, healthier turf plant.

The organic Humalite is a naturally occurring material found in the sub-bituminous coal fields of Alberta and approved for use in organic farming. Humalite is a soft, brown coal like material that is rich in humified matter and low in ash and other impurities.

Humic and fulvic acids increase the availability of nutrients with their high cation exchange capacity, and they are the strongest natural chelators in the world, making nutrients more plant available.

This product is a catalyst for all microbes and stimulates their activity in the soil. It will increase nutrient availability, soil aeration, and increase plant health and vitality.

The addition of humic and fulvic acids into your soil will help balance the soil pH, increase aeration and water retention. TourTurf® BEG helps to neutralise toxins and bind heavy metals. The combination of all these benefits builds plant biomass and creates a stronger, healthier turf plant.

Guaranteed content

Total Nitrogen (N)	0.8%
Potassium (K ₂ O)	20.0%
Humic acids	40.0%
Fulvic acids	3.0%
Calcium (CaO)	1.7%
Magnesium (MgO)	0.2%
Sulphur (SO ₃)	0.8%
Iron (Fe)	0.3%

Other elements:

Organic Carbon (C)	33.0%
Total organic matter	57.0%
CEC	266 meg/100g

pH: 10

Storage: Minimum Temp.: 5 °C - Maximum
Temp.: 40 °C

Application

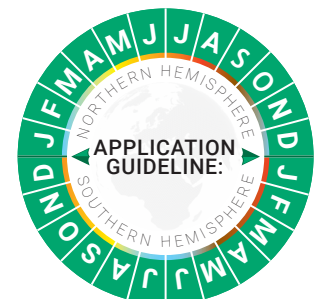

Applied twice a year, in spring and autumn.

Maintenance: 160kg/ha.
Grow-In: 200kg/ha.
Fairways & Stadions /
Renovation: 160kg/ha.
Divot mix & potting soil:
5kg/m³

SGN 100
