# TourTurf® CBL CalPlex Booster Liquid + LPT

Oxide: 6-0-0 + 8 % CaO

## Prevents calcium deficiency and helps develop heat-, drought-, disease resiliency in summer.

TourTurf® CBL CalPlex Booster Liquid + LPT is a liquid N-fertiliser with calcium (Ca) as well as amino acids from molasses + LPT Leaf Penetrant Technology. Also contains aromatic plant extract for enhanced turf resiliency. It is used to prevent calcium deficiencies, to strengthen turf against heat stress, drought stress and different fungal diseases (e.g. Anthracnose in late summer).

The product consists of calcium nitrate, calcium lignosulphonate, sugars with amino acids and LPT Leaf Penetrant Technology, plant extracts.

A liquid fertiliser that can be absorbed efficiently both foliar through the leaves and through the roots. The product is used against calcium deficiency in plants and soils.

The turf will be more disease resistant. Due to the calcium supply, the cell walls are significantly strengthened. Calcium is a macronutrient that is often deficient despite its natural presence in the root zone, especially during strong growth and wet conditions.

With strong growth, the plants often cannot absorb calcium fast enough. During wet weather, the transpiration flow is too weak to bring enough calcium to the growth points. Calcium is involved in many vital functions of plant cells. Calcium deficiency weakens cell walls and increases susceptibility to many fungal diseases.

### Guaranteed content

Total Nitrogen (N) .....	5.6%
- of which Nitrate (N).....	5.2%
- of which Ammonium (N) .....	0.4%
Calcium (CaO) .....	8.0%
<b>Other elements:</b>	
LPT* .....	2.0%
Total Carbohydrates.....	5.0%
(Glucose, Sucrose & Fructose)	

pH: 7.4

Density: 1.4

Nozzles: Spray nozzles for small droplets.

The product contains amino acids.

\*The product contains TourTurf® LPT. For more information, please see the datasheet or locate the product in the catalogue.

### Application

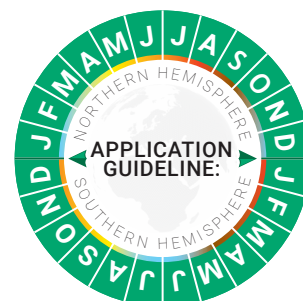

Once a month.  
**Deficiency:** Every 2 weeks.

10L/ha mixed in 700 L water.  
**Deficiency:** 20L/ha mixed in 700 L water.

Synergy

### Order number

8706  
2 x 10 litres per carton
