# TourTurf® Sport & Park Landscape

Oxide: 4-4-3 + 1.3 % MgO - Fairway Grade

All-round organic odourless composted fertiliser for early spring and autumn.

TourTurf® Sport & Park 4-4-3 is an organic slow-release NPK fertiliser with magnesium and calcium based on fully composted chicken manure. The product is approved for organic farming. Use this product for economical turf growth.

Due to the nature of the pellets, the most ideal application period for the product is outside the main turf growing season. Use the product also as an ideal grow-in product, to boost the microbial soil life and to add organic matter to poor, damaged or sandy soils for healthy and economical turf growth.

If you use the product as an early spring fertiliser or late autumn dormant feed, you are almost guaranteed success for your sports fields as you will boost the natural soil microorganisms. By using this strategy for natural fertilisation, you should be able to reduce the overall need for fertiliser. The product need some time to breakdown and get into the soil profile before the nutrients can be uptaken by the plant.

The product has a high natural content of organic matter, carbon, fulvic and humic acid and a good range of important macro- and micronutrients for healthy growth. The organic matter is broken down by the activity of microorganisms in the soil into nutrients, humic acids and amino acids. A special 7-day composting process makes the product completely odourless.

## Guaranteed content

Total Nitrogen (N) .....	4.0%
- of which organic nitrogen (N) .....	3.6%
- of which ammonium (N).....	0.4%
Phosphorus (P <sub>2</sub> O <sub>5</sub> ).....	3.0%
Potassium (K <sub>2</sub> O).....	3.0%
Magnesium (MgO).....	1.3%
Calcium (CaO) .....	10.0%
Sulphur (SO <sub>3</sub> ).....	0.5%
Micronutrients .....	0.2%
(Fe, Mn, Zn, Cu, B, Mo & Co)	

## Other elements:

Organic Carbon (C) .....	31.8%
Humic acids .....	5.0%
Fulvic acids.....	10.0%
Organic matter .....	62.0%
Circular content.....	100.0%

## Application

2 times.

**Healthy Growth:** 300-500kg/ha.  
**Grow-In:** 300-500kg/ha.  
 Worked into the rootzone.

Size 6mm (pellets)

## Order number

32019BB

2 x 500kg big bag per pallet

32019NG

50 x 20kg bags per industrial pallet
