Even growth and healthy soils on larger sports turf areas.

TourTurf® Sport & Park Turf 10-5-15 is an organic-mineral NPK-fertiliser with two nitrogen sources for fast and slow-release of nitrogen. The fertiliser is a good all-round product for larger sports turf areas like fairways, tees and football pitches.

The fertiliser is a combination of various organic and mineral inputs. By the use of both organic and mineral compounds, the product is able to deliver available nutrients to the turf plant immediately and at the same time benefit the soil profile by adding organic matter. This will stimulate the microbial life in the soil and secure a long-term release of plant available nutrients.

The benefits for the soil profile will only be enhanced by continuously use of organic fertilisers. It will promote a healthy ecological balance and secure an even growth throughout the growing season.

The added magnesium in the product will make the turf look dark green and the seaweed will provide vitamins and minerals to benefit both soil and plants.

Guaranteed content

Total Nitrogen (N)	10.0%
- of which organic nitrogen (N)	7.0%
- of which ammonium (N).....	3.0%
Phosphorus (P ₂ O ₅).....	4.9%
Potassium (K ₂ O).....	15.0%
Magnesium (MgO).....	2.0%
Sulphur (SO ₃).....	0.4%
Total Micronutrients.....	0.4%
(Ca, Cr, Cu, I, Mn, Mo, Na, Se & Zn)	
Other elements:	
Total Carbon (C)	21.5%
Organic matter	24.6%
Amino acids (16 in total)	0.3%
Total carbohydrates	19.7%
Bioactive elements.....	0.1%
(Alginic acid, Laminarin, Fucoidan, Mannitol)	
Circular content.....	73.0%

Application

2-3 times a year.

300kg/ha.

Size 2-4mm.
SGN 330.

pH: 7.7

The product is low in chlorine.
