TourTurf® TSC

Turf Surface Conditioner + LPT

Oxide: 0-0-0 + 7 % Fe

Photo: © Jacob Sjöman - The Scandinavian

Hardens turf and slows down moss and algae invasion.

TourTurf® TSC Turf Surface Conditioner is a liquid iron fertiliser with sulphur and aromatic plant extracts for the strengthening of sports turf all year round. The product's low pH and acidifying effect ensures fast green-up, turf hardening, a better soil pH balance and a denser playing surface helping to lessen the impact of moss. Iron is absorbed through the plant leaf, giving rapid results for turf, but has been known to blacken moss within hours.

The acidification of the upper rootzone provides the grass roots with a better growing environment and chance for the ability of the finer grass species to thrive and to compete with moss.

TourTurf® TSC contains iron sulphate (ferric sulphate), sulphur, and a citric acid complex to acidify and promote better turf growth and resilience. It eliminates iron deficiency immediately and is safe to use due to its low scorch potential. Promotes moss-free playing surfaces, also consider factors like compaction, drainage, shade, low height and low fertility.

The use of the product should be combined with mechanical turf care, removal of unwanted shade and surface moisture, which is part of the greenkeeping routines to create brilliant playing surfaces.

Apply at any time of the year, provided the grass is dry and rain is not expected. Especially useful in the autumn/winter months as an all-round turf hardener as the product does not contain nitrogen. Do not apply in frost.

Guaranteed content

Iron (Fe)	7.00%
Sulphur (SO ₃)	11.25%
Other elements:	
LPT*	4.0%

Formulated with acidifying complexing agents.

Application

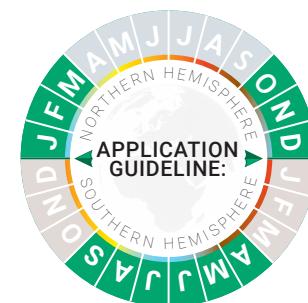

Apply monthly or as needed.

Moss Resiliency: 40L/ha mixed in 500-700 L of water.
Turf Hardener: 40L/ha mixed in 500-700 L of water.
Tournament: 40L/ha mixed in 500 L of water.
Greenup: 20L/ha mixed in 500 L of water.

Synergy with TSA & PTC
